for Great
Water!**

WATER^{Rx}

The WH (whole house) line of units is designed to blanket your home or office in protection from all of the unwanted additives and contaminants your supply system may have.

By attaching a large capacity tank at the main to your home, the WaterRx system gives your entire home bottled water quality at a fraction of the price. The process is simple. Browse the whole house series of units, and choose the unit that feels right for you.
